# What Is It?

Hyperautomation is the next big thing in finance. By combining RPA, AI, and machine learning, it creates end-to-end automation for workflows like invoicing, reconciliation, and budgeting.

# The issue

Manual workflows and disconnected systems cost finance teams countless hours, increasing errors and delays.

# Why this happens

Most companies use siloed systems, making automation efforts piecemeal instead of holistic

# Hyperautomation

A unified strategy to integrate tools like UiPath, Power Automate, and AI models to automate not just tasks but entire processes. A unified strategy to integrate tools like UiPath, Power Automate, and AI models to automate not just tasks but entire processes.

## The Payoff

Deloitte predicts  
hyperautomation could  
reduce operational  
costs in finance by up  
to 40% by 2025

## Fun Fact

- Companies using hyperautomation are 3x more likely to meet reporting deadlines, according to Gartner

# Gartner

# How to start?

- 1 Identify repetitive tasks ripe for automation (e.g., accounts payable).
- 2 Invest in tools like WorkFusion for hyperautomation.
- 3 Align finance and IT teams to map end-to-end workflows.
